

21 Series - Adjustable Length

Bocci

Product Type

Ceiling

21 results from a fabrication process in which thin porcelain sheets are draped over an inverted diffuser made of sandblasted borosilicate glass. The thin porcelain skin is allowed to dress the borosilicate core in whatever form occurs naturally – creating a unique shape in every iteration of the fabrication process. Each glass diffuser houses a low-voltage xenon or LED lamp. A strong contrast occurs between the soft, organically distributed light passing through the white porcelain skin and the crisp light moving through the glass diffuser. 21s are designed to cluster in groups, with individual pieces touching each other to create a layered composition in three dimensions.

Dimensions

L5" x D6,5"

L13cm x D16,5cm

Voltage (V)

1.5w LED or 20w xenon
