

## Folding Shelves

Muller Van Severen

**Product Type** Shelving

Folding shelves is an object first shown in 2014 at New York, the second solo exhibition of Muller Van Severen at Valerie Traan, Antwerp. Soberness, playfulness and transparency remain the key aspects. This time combined with rusted steel and aluminium. Unlike other objects in this series, such as 'double desk' and '3 pieces desk', this piece isn't lacquered and plays with different color tonalities of metal. The aluminium, rusted steel and brass structures are linked to each other by thin cylindrical bars and can rotate allowing the furniture to take on different forms. This is an object that excels in transparency. The rusted steel middle piece seems to float in the air.

*Limited edition 8 + 2 AP*

### **Dimensions**

L118,1" x D15,75" x H57,9" (extended)

L300 cm x D40 cm x H147 cm (extended)
