

Fiorenza

Arflex

Product Type Lounge Chair

In a fifties' Pirelli advertisement the Fiorenza armchair, designed by Franco Albini in 1952, was used as an image of foam rubber's potential, which fits like a glove and at that time was the most technologically advanced material used in upholstered furniture.

STRUCTURE: Solid fir wood.

SPRINGING: Elastic straps.

SEAT UPHOLSTERY: Shaped polyurethane with differentiated density / polyester slip cover.

BACKREST AND ARMRESTS UPHOLSTERY: Shaped polyurethane with differentiated density / polyester slip cover.

BASE: Beech wood, walnut stained or black lacquered.

COVER : Fabric or leather. Not removable cover.
