

Column JA2

&tradition

Product Type Shelving

The Column shelves bring order to clutter in a supremely simple design comprising two iconic shapes that can be configured according to mood. English designer John Astbury questions the purpose of a design as his starting point, paring back to its purest form before crafting objects that can make a difference to our lives. Case in point: the Column shelves, a series of two archetypal shapes in a soft expression — simple and unassuming without imposing their presence on a space.

Dimensions W31.5
