

## Rotea

Matter Made

**Product Type** Ceiling

The Rotea pendant collection gets its name and spiraling decoration from the careful and precise spinning motion applied to the glass when being produced.

*Roteare*, the Italian word for “twirling”, is the technique used by master craftsmen in Murano, Italy to create the blown glass shapes of Rotea. Fixed to a black chrome structure, the internal light bulb enliven the distinctive textures of Rotea, generating light effects passing through transparent and opaque surfaces.
