

Chair 2

Muller Van Severen

Product Type Dining Chair

Designer duo Muller Van Severen launches a collection in aluminum. "We've been intrigued with the different ways of coloring and treating the surfaces of the aluminum. We like industrial references so we used hammer blow finishing paint. You often see this paint applied on mechanical equipment, machines or laboratory equipment. It's textured and therefore ideal to cover up bumps in metal. It's UV-resistant and water-repellent so all these pieces can be used outside.

Dimensions

W14,9" x D19,2" x H31,4"

W38cm x D49cm x H80cm

UPON ORDERING THIS DESIGN
