Astep

Product Type Sconce

Throughout his life, the sky served as a muse for lighting master Gino Sarfatti. He was fascinated by the perfect light emitted by the Moon, and one of Gino Sarfatti's most brilliant designs is inspired by the natural poetry of the luminous satellite. In 1959, Le Sfere was launched in a solar system of its own, revolving around a single luminous sphere. Le Sfere features a simple, yet elegant principle in which a blown opaline glass sphere is held in place by a painted aluminium ring. A refined embrace that lends the luminaire a graphic expression and brings forth its distinctive aesthetic.
