

Beam Table

Established & Sons

Product Type Dining Table

Designed by Konstantin Grcic, the Beam Table merges premium design with an industrial aesthetic and an undeniably strong presence. The table is equally at home in an artisan's workshop, a gallery, a family home or a live-work space. The rolled steel i-beams that form the structure of the table are coated in a fine-textured powder coat in either jet black or red oxide and sit on adjustable round feet that help protect the ground beneath. Optional lockable swivel-castors allow the table to be easily moved, helping it adapt to many different uses. Solid-lipped table tops are available in oak veneer, a high-pressure laminate in black or in black Fenix, a heat-and-scratch resistant, high-end surface material.
