

Dia Side & Coffee Table

Neo/Craft

Product Type Table

The Dia Table combines clean geometry with reflective surfaces, resulting in a design that is both timeless and futuristic. Its unique feature lies in the interplay between the round mirrored surfaces of equal size, which creates a captivating endless reflection.

The mirrored base nearly disappears, giving the illusion that the tabletop is emerging through a hole in the floor—a concept that inspired the table's name. "Dia," derived from the Greek word meaning "through," perfectly encapsulates this extraordinary design. The semi-mirrored tabletop, with its color-effect coating, shimmers in complementary reflection and transmission hues, which are beautifully mirrored on the neutral base.
