

Landi Chair

Vitra

Product Type Chair

Developed for the 1939 Swiss National Exhibition (Schweizer Landesausstellung), the Landi Chair occupies an important place in the history of twentieth-century design: this classic by Hans Coray established the new typology of a three-dimensionally moulded seat shell on a separate base. The clear structure of the all-aluminium chair consists of two parts. First, a pair of U-shaped profiles connected by welded crossbeams form a self-supporting frame and simultaneously serve as the legs and low armrests. This base supports a seat shell, which makes ideal use of the material's possibilities: the 91 punched holes not only ensure the modest weight and flexibility of the comfortable shell, but also give the graceful Landi its trademark appearance.

Dimensions

W 16" x D 25,5" x H 31,75"

W 40,5cm x D 65cm x H 79,5cm

UPON ORDERING THIS DESIGN
