

Curved Stools

Estudio Rain

Product Type

Stool

Curved Bench exploits the flexibility of wood to assimilate the curves of the body. Alluding to a fundamental building system, the benches form a trilitic structure, where two vertical plates perform the base and an horizontal curved one the seating. The elements suggest a subtle balance in which the parts seem just touch each other.

Although composed of few elements the set creates a solid and unexpected visual block. The juxtaposition of the curved plate with the vertical planes generates a slight encounter, marked by a linear shadow at its junction. The project seeks to dialogue with the Brazilian tradition of carpentry through a minimalist language.

Dimensions

Small

W23,62" x D14,9" x H16,5"

W60cm x D38cm x H42cm

Large

W66,9" x D14,9" x H16,5"

W170cm x D38cm x H42cm
