

Aura Light

Established & Sons

Product Type Pendant

Harnessing Marcellis' expertise in the utilization of cast translucent materials, the suspended cylindrical bar of the Aura Light can stand alone or work as part of a grouping. Over a meter in length, the design is made from a bio-epoxy resin, formulated using by-products from the agricultural industry.

A replaceable glass LED tube is housed within the resin case, with the light traveling through the material to create a warm glow. Easy on the eyes, this soft ambient light effect is ideal for a home-working environment as well as relaxed living and office spaces.
