

Matera Three elements ottoman with fabric table

Tacchini

Product Type Ottoman

Entering an imaginary tour of new creative scenarios, you enter the extraordinary urban ecosystem that are the Sassi of Matera. The Matera modular system designed by the Maltese designer Gordon Guillaumier is composed of padded elements with full volumes, which can be used individually or intersected with each other. The composition is completed with shelves in wood, marble or covered in fabric, equipped with wireless chargers at the meeting point between the seats. The Matera family is designed for contract areas with the intention of creating informal chairs that become islands of conversation, waiting, meeting and work.
