

Tela High Stool

Wentz

Product Type High Stool

The high stool is the newest release of the Tela series. The backrest weave is inspired by the classic cane woven pattern of the mid-century furniture. It was recreated in a larger scale and made with cotton thread for more comfort and durability. While the back emphasizes the pattern, the slim frame and molded seat have smooth details and curves with a contemporary design approach. Tela High Stool is available in bar and counter heights versions to better adapt to architectural projects.
