

SHY Sconce

Bec Brittain

Product Type Sconce

The SHY light uses the spare beauty of thin LED tubes to define the edges of its shape; in this way the function of the piece is created by its form and vice-versa. The modular hardware can be reconfigured in a myriad of different ways, taking new shapes according to what the space demands.

Sconces include a backplate and low voltage transformer for remote located installation.

Backplate and mounting box for local installation of the transformer is available for an additional \$600 per backplate.
