

16 Series

Bocci

Product Type Chandelier

16 is formed by sequentially pouring three separate layers of coloured, molten glass in varying opacities on a horizontal plane. Each layer responds to the indeterminate shape of the previous pour to create a uniquely layered whole. Two of these pieces are then attached and illuminated with an internal LED lamp. The finished 16 is visually complex: each separate colour layer is visible through the other layers, with light reflecting along the edges.

A modular armature system connects the glass pieces to a series of branches and stems. Each armature segment carries low-voltage electricity and diverges into 2-4 separate branches, allowing both vertical and horizontal deployment with an infinite variety of possible forms. The branches simply click together during installation for custom, on-site arrangements.

MATERIALS

Poured glass, stainless steel

DIMENSIONS

W 8" x D 2.5" x H 8.5"

UPON ORDERING THIS DESIGN
