

Stack Chest of Drawers

Established & Sons

Product Type

Drawer

In this innovative design Shay Alkalay challenges our perception of what a drawer unit can be. Individual, multicolored, "floating" drawer units are built up creating a tower of drawers that can be pushed and pulled in both directions. This will often result in a random and irregular composition that is both fascinating and unusual to the eye. Appreciated from all angles as a sculptural object as well as an entirely functional, practical item of furniture, Stack creates a rich and wonderful spectacle of color and form. "I think chests of drawers look more intriguing when the drawers are left partly open." Shay Alkalay
