

Writing Desk + Low Table

Muller Van Severen

Product Type Desk

New writing desk + low table is an object first shown in 2014 at New York, the second big solo exhibition by Muller Van Severen. This piece is a lot of furniture. The shelves are placed at different heights and there's a low table with big proportions flanking the construction. Muller Van Severen reordered the surfaces of a desk as an experiment. To keep the composition in balance, a lamp is added, overlooking the whole.
