

Bodystuhl Woven cane seat and backrest

Wiener GTV Design

Product Type Dining Chair

Thanks to the striking effect of the steam-bent beech, the Bodystuhl chair proposed by Nigel Coates shows a profile showing sinuous shapes characterized by a structure with variable thickness. The large seat and the ergonomic backrest, made in woven cane, recall shapes and materials of Lehnstuhl, already designed by the English designer for Wiener GTV Design.

Dimensions

W22,8" x D22,8" x H31,4"

W58cm x D58cm x H80cm
