

Mos - Bench

Wiener GTV Design

Product Type Bench

Carefully calibrated in its dimensions, the MOS bench by GamFratesi has a double function as a seat and a container with open shelf. A contemporary take on a traditional piece, MOS is designed for the bedroom and would be perfect at the end of a bed. However, its subtle, sophisticated character means that it would work well in a hall or lounge too.

Sleek and delicate in its aesthetics, with an elliptical shape, MOS really comes into its own when you notice the attention to detail, such as the inviting woven cane shell which conceals the lower surface and connects the seat to the feet, with their brass feet. The structure is made from bent beech-wood, while the bench surface is in open-pore painted ash, with a full-length upholstered cushion. Also available with a shorter seat cushion and exposed bench surface.

Dimensions

W53,5" x D16,9" x H17,3"

W136cm x D43cm x H44cm
