Wiener GTV Design

Product Type Dining Chair

An unusual classic. Elegant and comfortable. The new color variants of this chair evoke the ambiance of the cafe society. A new edition of the model originally designed by Adolf Loos, with an austere steam bentwood beech design that slims the backrest and redesigns space. The ring-shaped seat stabilizes the feet bent from a single piece of wood. Back legs and backrest have also been formed from a single piece of bentwood. Available with a wide range of different seats.
