

## Trono Block Umberto Bellardi Ricci

## Product Type Stool

Exploring the dialogue between different materials, Umberto Bellardi Ricci gives life to a collection that stimulates the interaction between architecture and design. In Trono, two simple geometries, such as the cube and the circle, become the support—the throne—of the person who sits down on it. The generous shapes of the seat contrast with the essentiality of the leg in a clean structure that enhances the contrast between raw materials and refined textures and fabrics. A low table completes the family: supported by the same essential leg as the stools, it takes up the material contrast in the elegant round marble top.

## Dimensions

W14,5" x D14,5" x H16,5" W37cm x D37cm x H42cm
