

Maré Coffee Table

Wentz

Product Type Coffee Table

Maré Coffee Table portrays the phenomenon of water transition. The table top is divided into three parts – and heights – simulating the arrival or the return of the waves. The black base gives a sense of depth, where matter is dense, complex and mysterious, like the ocean at night. The white stains, in contrast, recall the foam of the break, the becoming of the wave: stirred water, clarity and friction.

The choice for the long, rectangular base contrasts with the wavy shapes, which give life to the table's layers. The furniture becomes a landscape for the room, or better: a landscape photography.
