

Tidal Collection Wave

CC-Tapis

Product Type Ru

Germans Ermičs' exploration of the symbiotic relationship between color and ornament continues, expanding the Tidal Collection with two new color combinations and a brand-new runner rug: Tidal Wave. Seen as the primary element, color adds a third dimension to the two-dimensional surface of each rug, moving and animating its design. "I start with basic geometric forms, circles, squares and rectangles and I let the design transform them," the designer says of the process.
