

Trono Side tables

Umberto Bellardi Ricci

Product Type Low Table

The Trono low side table stimulates interactions between design and architecture while encouraging an interesting dialogue between geometric shapes, materials, and textures.

In his infinite experiments, designer Umberto Bellardi Ricci takes two simple geometries and transforms them into a support – a throne – for those who sit on it. The generous and comfortable seat contrasts with the static leg in a clean structure that highlights the contrast between raw materials and refined fabrics. The family is completed by a side table that echoes the material contrasts in the elegant marble top, supported by an essential leg, as seen in the stool designs.
