

Lunar Lamp

Tacchini

Product Type Ceiling

Lunar form a constellation of scrunchable, glowing lights designed by Faye Toogood. This range of lighting epitomises Toogood's playful and tactile taxonomy of materials. Lunar are quilted pendant lights with crumpled, papery covers. Internal wadding diffuses the light, giving Lunar a soft glow.

Although each light is the same design the crunchable material framing the bulb can be scrunched and folded, holding shape and giving each light its own unique character. You could hang a whole room with Lunar and no two would be look exactly the same. With a nod to the light's origins, Lunar is available in international paper sizes A2, A1 and A0.
