

Iris Globe

Neo/Craft

Product Type Pendant

The Iris Globe pendant by Sebastian Scherer. This light enchants with its design, reminiscent of a shimmering soap bubble. Each hand-crafted crystal glass sphere is meticulously made and coated with a nano-thin layer of metal oxide, creating a unique interplay of complementary colors through light interference.

The innovative integration of the light source enhances the mesmerizing effect by producing a unique light column inside the lamp and offering a spectrum of color variations. Available in iridescent and clear versions, the Iris Globe light is a true masterpiece, blending traditional craftsmanship with modern technology.
