

Stellar Mirror

Tacchini

Product Type

Mirror

Stellar takes Tacchini's traditional upholstery and brings it to unexpected places, such as the frame of this soft and extroverted mirror. It is part of the Cosmic collection created with Faye Toogood.

Stellar takes the form of a mirror embedded in a cushion. Designed by Faye Toogood, it reflects the materials and shapes used throughout Cosmic – the collection from the studio in collaboration with Tacchini – as well as the informal and playful style of the designer. Her groundbreaking creativity reinterprets Tacchini's traditional upholstery and transforms it into a tactile and soft structure, ready to embrace the hard, shiny surface of a mirror.
