

Eclipso Shelving

BD Barcelona

Product Type Shelving

The ECLIPSO Shelving Units by Jaime Hayon provide a versatile and dynamic solution for organizing and defining spaces. Inspired by rounded forms and the quiet magic of a lunar eclipse, the open system functions as both storage and a space divider, creating rhythm and flow within interiors. Constructed with 95% recycled Hydro Low Carbon aluminum columns and 3 cm MDF shelves in a satin lacquer finish, the units are durable and designed for everyday use.

Satin-finished nylon glides ensure stability and protect floors. Available in monochrome green, oxide red, and beige, and in three heights (2-, 3-, and 4-shelf units), the shelving adapts seamlessly to residential and hospitality settings, transforming practical storage into a dynamic element that enhances everyday life with elegance and effortless presence.
