

Rivet Box Table

Frama

Product Type Table

The Rivet Box Table is a sturdy, timeless piece of furniture that can be arranged vertically or horizontally and can be used as a table, a storage unit, a pedestal for display, or a combination of all three. Based on a riveting technique suitable for making perpendicular joints between separate, laser-cut raw aluminum sheets, the item is put together by hand using a hammer in a cold-forming assembly process developed by designer Jonas Trampedach in 2011.

Adapted in Italian glass from its aluminum predecessor designed by Jonas Trampedach, it offers a light and open expression in any room of the home.

Dimensions

W 32,8cm x D 33,8cm x H 48,1cm

W 12,91" x D 13,31" x H 18,94"
