

## Rivet Shelf

Frama

### Product Type      Shelving

The Rivet Shelf explores basic storing facets within one shape while functioning as a storage and display platform. Based on a riveting technique suitable for making perpendicular joints between separate, laser-cut raw aluminum sheets, the shelf is put together by hand using a hammer in a cold-forming assembly process developed by designer Jonas Trampedach in 2011.

### Small

#### Dimensions

W 38,7cm x D 39,5cm x H 76cm

W 15,24" x D 15,55" x H 29,92"

### Large

#### Dimensions

W 87,6cm x D 24,4cm x H 20,6cm

W 34,49" x D 9,61" x H 8,11"

### Thickness

4 mm
