

Rivet Case

Frama

Product Type Shelving

The Rivet Case convinces with its solid and versatile design. It can be placed vertically as well as horizontally while functioning as a table, storage, or display room. Based on a riveting technique suitable for making perpendicular joints between separate, laser-cut raw aluminum sheets, the case is put together by hand using a hammer in a cold-forming assembly process developed by designer Jonas Trampedach in 2011.

Dimensions

W 98,3cm x D 33,8cm x H 48,1cm

W 38,70" x D 13,31" x H 18,94"

Thickness

4 mm
