

Model 2065

Astep

Product Type Ceiling

Elegance and lightness are recurrent themes the work of Gino Sarfatti, and Model 2065 is no exception.

Model 2065 consists of a diffuser made of two joined opalescent methacrylate saucers, suspended from the ceiling with a black painted aluminium canopy. The simplicity of the design and lightness of the materials makes for a perceptively weightless luminaire.

The model has been featured in a number of significant interior projects by Italian architects such as Vito Latis and Vittoriano Viganò, and became a widely popular model within the Arteluce Collection. 1963 / 2019

Matter rewires some Astep products to meet US Standards when required. UL listing available upon request at an additional cost.
